Html & css

Group-12 Demis Hassabis

Project overview

This project is a **multi-page productivity website** built using:

•HTML5
•CSS3
•Simple JavaScript

It helps users manage:

✓ Tasks
✓ Reminders
✓ Tools
✓ Templates

Folder Structure

Project Files

- index.html
- login.html
- dashboard.html
- todo.html
- reminder.html
- styles.css
- script.js

The project is divided into multiple pages for better navigation and user experience.

Home page (index.html)

Code

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <title>Productivity Tool</title>
    <link rel="stylesheet" href="styles.css">
</head>
<body>

<header class="hero">
    <h1>Clarity, finally.</h1>
    <p>Organize your work and life.</p>

    <!-- RANDOM PHRASE -->
    <p class="quote" id="quote"></p>

    <!-- REMINDER BOX -->
<div class="reminder-box">
    <input type="text" id="reminderText" placeholder="Remind me to…">
    <input type="datetime-local" id="reminderTime">
    <button onclick="setReminder()">Set reminder</button>
</div>

    <!-- NAV / CTA -->
    <div class="nav-glass">
    <a href="features.html">Features</a>

    <a href="templates.html">Templates</a>

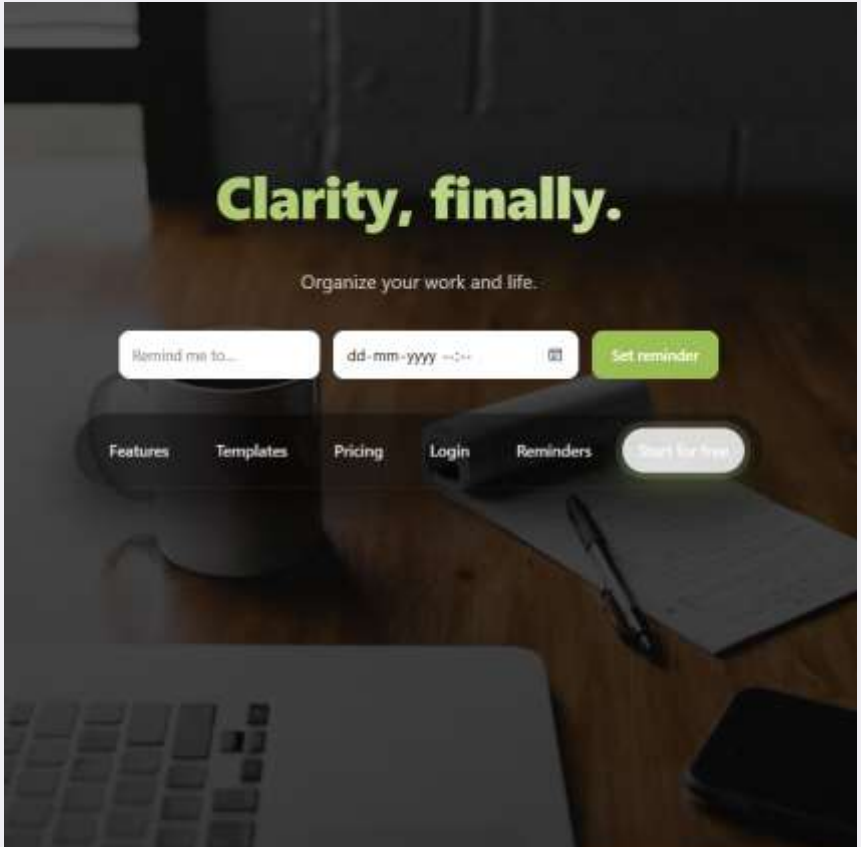
    <a href="pricing.html">Pricing</a>

    <a href="login.html">Login</a>

    <a href="reminder.html">Reminders</a>

    <a href="todo.html" class="btn-primary">Start for free</a>
</html>
```

Output



Login Page (login.html)

Code

```html
<!DOCTYPE html>
<html>
<head>
    <title>Login</title>
    <link rel="stylesheet"
href="styles.css">
</head>
<body>

<section class="page">
    <h1>Login</h1>

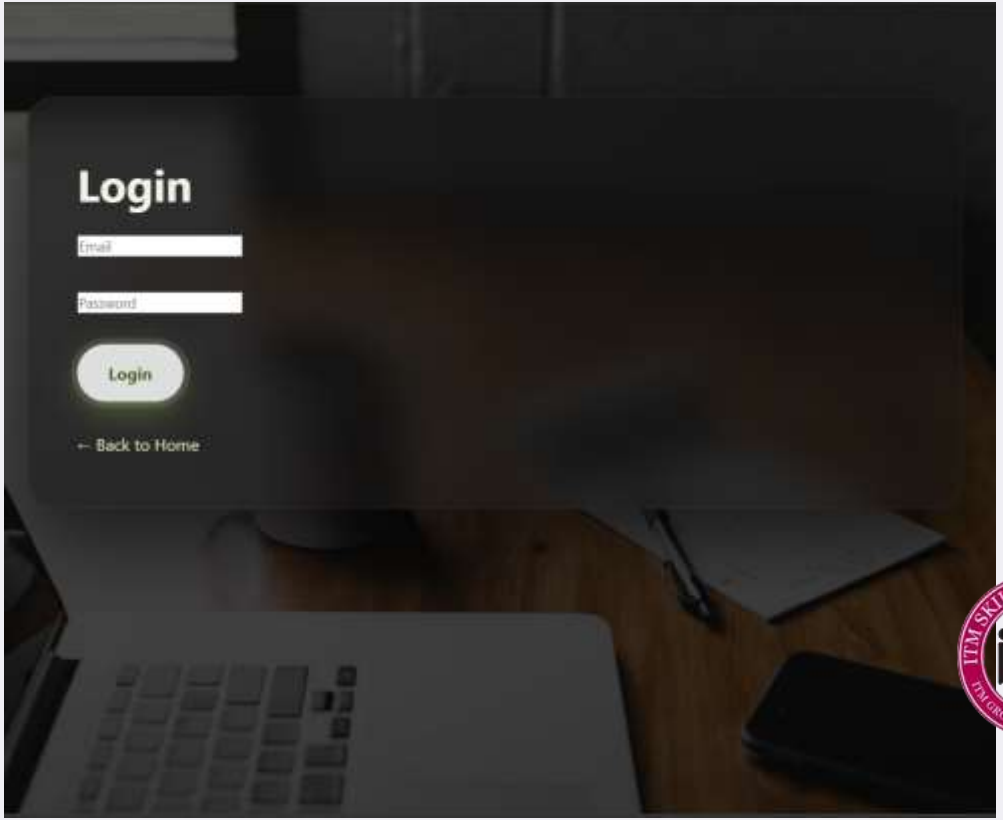
    <input type="email"
placeholder="Email"><br><br>
    <input type="password"
placeholder="Password"><br><br>

    <!-- After login page -->
    <a href="dashboard.html"
class="btn-primary">Login</a>

    <br><br>
    <a href="index.html">← Back to
Home</a>
</section>

</body>
</html>
```

Output



Dashboard Page (dashboard.html)

Code

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <title>Dashboard</title>
    <link rel="stylesheet"
href="styles.css">
</head>
<body>

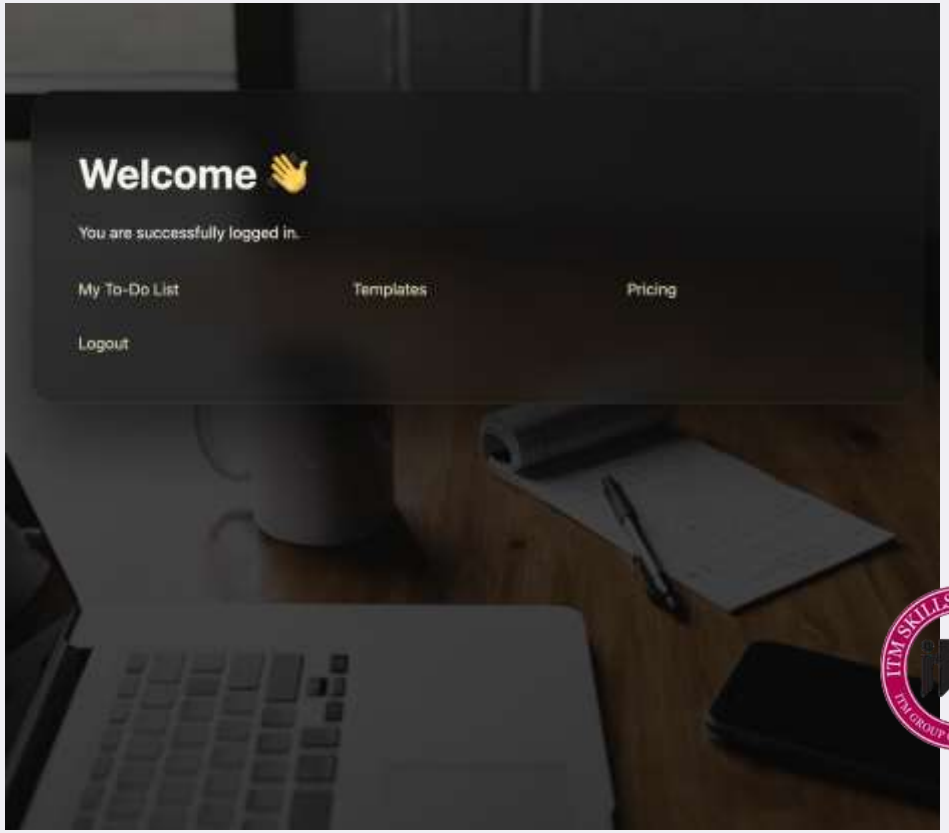
<section class="page">
    <h1>Welcome</h1>
    <p>You are successfully logged in.
</p>

    <div class="template-grid">
        <a href="todo.html"
class="template">My To-Do List</a>
        <a href="templates.html"
class="template">Templates</a>
        <a href="pricing.html"
class="template">Pricing</a>
    </div>

    <br>
    <a href="index.html">Logout</a>
</section>

</body>
</html>
```

Output



Features Page (features.html)

Code

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <title>Features</title>
    <link rel="stylesheet"
href="styles.css">
</head>
<body>

<section class="page features-page">
    <h1>Features</h1>
    <p class="subtitle">Everything you
need to stay organized and focused.</p>

    <div class="features-grid">
        <div class="feature-card">
            <h3>📄 Task
Management</h3>
            <p>Create, track, and
complete tasks effortlessly.</p>
        </div>

        <div class="feature-card">
            <h3>⏰ Smart
Reminders</h3>
            <p>Never forget important
tasks with scheduled reminders.</p>
        </div>
```

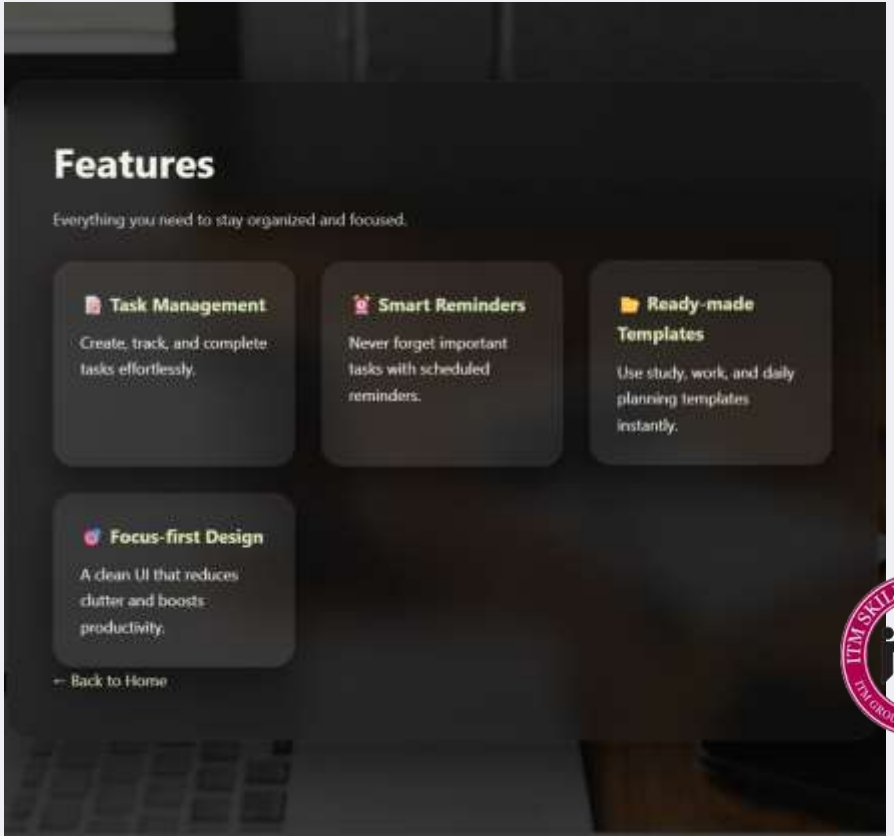
```html
        <div class="feature-card">
            <h3>📁 Ready-made
Templates</h3>
            <p>Use study, work, and
daily planning templates instantly.</p>
        </div>

        <div class="feature-card">
            <h3>🎯 Focus-first
Design</h3>
            <p>A clean UI that reduces
clutter and boosts productivity.</p>
        </div>
    </div>

    <a href="index.html" class="back-
link">← Back to Home</a>
</section>

</body>
</html>
```

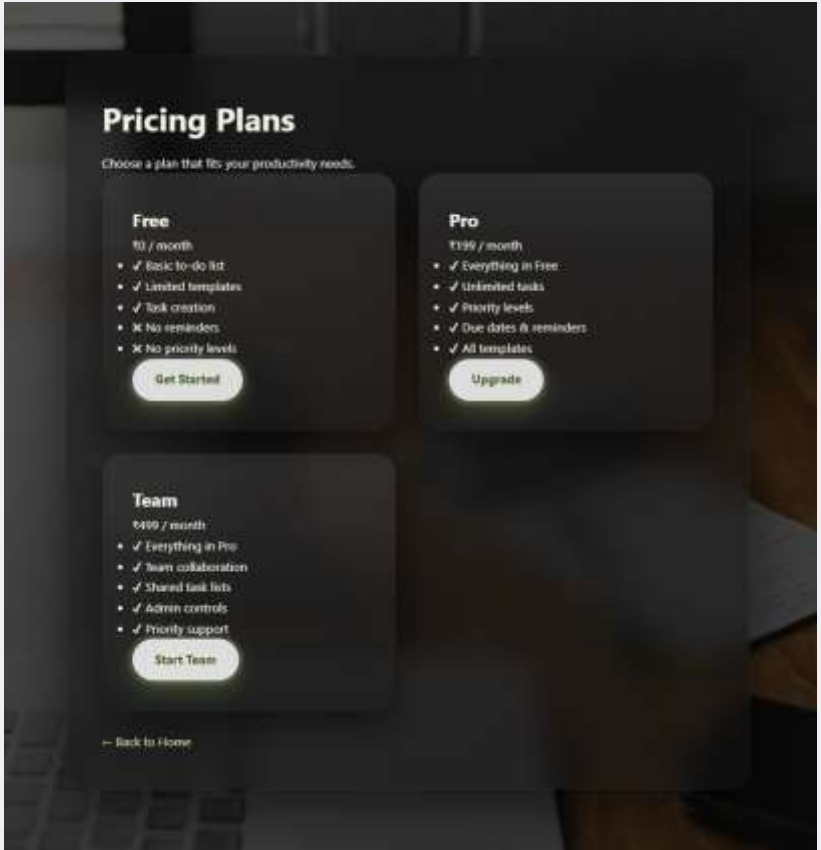
Output



Pricing Page (pricing.html)

Code

Output



Templates Page (templates.hmtl)

Code

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <title>Templates</title>
    <link rel="stylesheet"
href="styles.css">
</head>
<body>

<div class="glass-card">
    <h1>Templates</h1>
    <p class="subtitle">Choose a
template to get started quickly.</p>

    <div class="template-grid">
        <a href="Template/work.html"
class="template-tile">
            <h3>Work Tasks</h3>
            <p>Plan meetings,
deadlines, and priorities.</p>
        </a>

        <a href="Template/daily.html"
class="template-tile">
            <h3>Daily Planner</h3>
            <p>Organize your day from
morning to night.</p>
        </a>
```

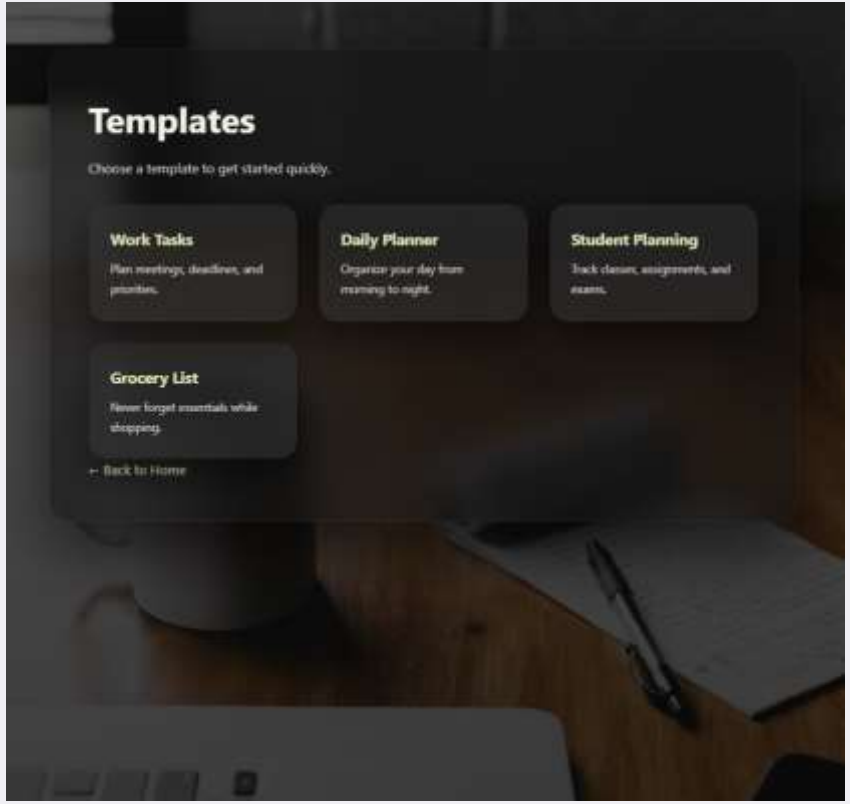
```html
        <a href="Template/student.html"
class="template-tile">
            <h3>Student Planning</h3>
            <p>Track classes,
assignments, and exams.</p>
        </a>

        <a href="Template/grocery.html"
class="template-tile">
            <h3>Grocery List</h3>
            <p>Never forget essentials
while shopping.</p>
        </a>
    </div>

    <a href="index.html" class="back-
link">← Back to Home</a>
</div>

</body>
</html>
```

Output



Todo Tool (todo.html)

Code

```html
<!DOCTYPE html>
<html>
<head>
    <title>My Tasks</title>
    <link rel="stylesheet"
href="styles.css">
</head>
<body>

<section class="todo-container">
    <h1>My Tasks</h1>

    <div class="todo-input">
        <input id="taskInput"
type="text" placeholder="Add a task">
        <button
onclick="addTask()">Add</button>
    </div>

    <ul id="taskList" class="task-
list"></ul>

    <a href="index.html">← Back to
Home</a>
</section>
```

```html
<script>
function addTask() {
    const input =
document.getElementById("taskInput");
    const list =
document.getElementById("taskList");

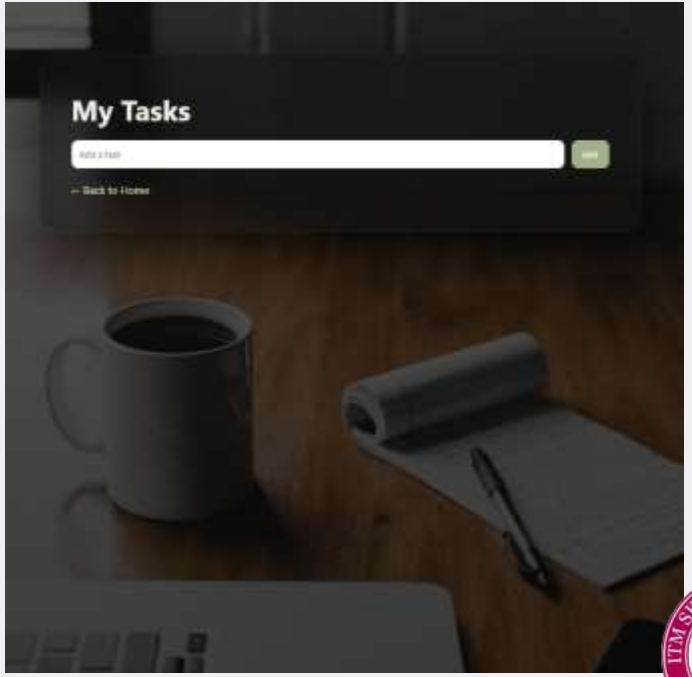
    if (input.value.trim() === "")
return;

    const li =
document.createElement("li");
    li.innerHTML = `
        <span>${input.value}</span>
        <button
onclick="this.parentElement.remove()">
❌</button>
    `;

    list.appendChild(li);
    input.value = "";
}
</script>

</body>
</html>
```

Output



Reminder tool (reminder.html)

Code

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <title>Reminders</title>
    <link rel="stylesheet"
href="styles.css">
</head>
<body>

<section class="page reminder-page">
    <h1>Reminders</h1>
    <p class="subtitle">Schedule tasks
so you never forget.</p>

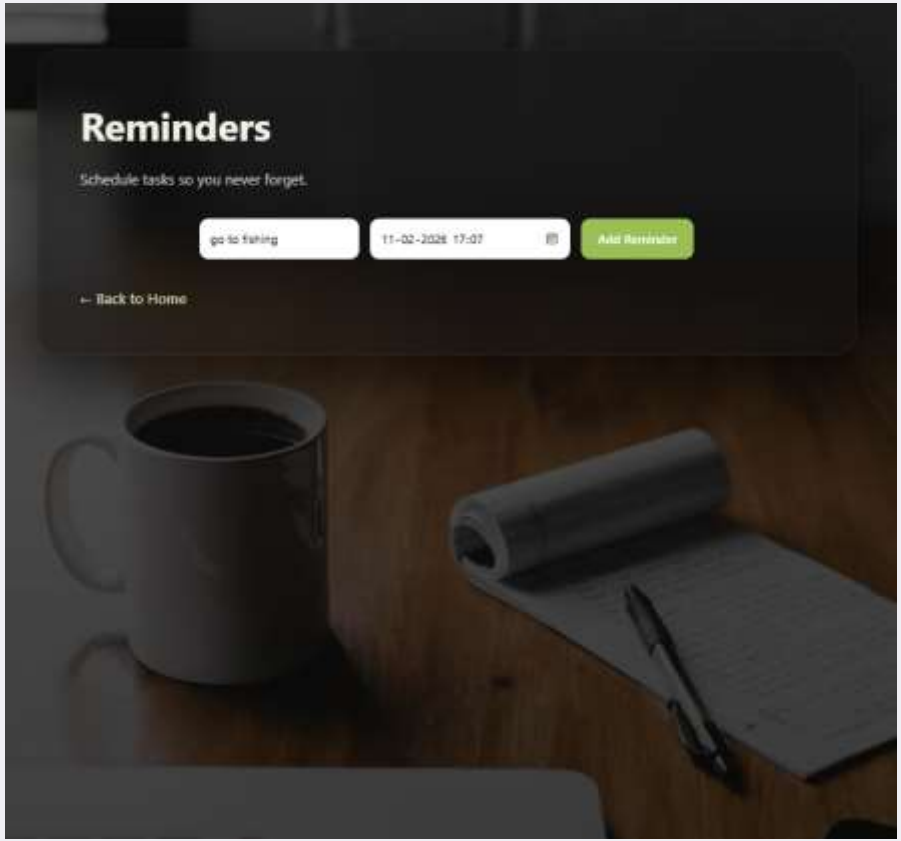
    <div class="reminder-form">
        <input type="text"
id="reminderText" placeholder="Reminder
title">
        <input type="datetime-local"
id="reminderTime">
        <button
onclick="addReminder()">Add
Reminder</button>
    </div>

    <ul id="reminderList"
class="reminder-list"></ul>

    <a href="index.html" class="back-
link">← Back to Home</a>
</section>

<script src="reminder.js"></script>
</body>
</html>
```

Output



Conclusion

This **HTML and CSS Productivity Tool Website** project helped me understand the basics of modern web development.

Through this project, I learned:

- How to create a **multi-page website**
- Designing responsive layouts using **CSS**
- Building different sections like **Login, Dashboard, Todo, Reminder**
- Improving user experience with clean UI and navigation

Overall, this project enhanced my skills in:

HTML Structure
CSS Styling
Website Design
Front-End Development
